THURSDAY EDUCATION SESSIONS

Mastering Business Auto Symbols - Their Importance and How They “Work”

The Insurance Services Office (ISO) Business Auto Coverage Form is an incredibly important risk finance tool for many of our clients. Agents MUST understand this policy’s coverage symbols and how they are essential to the process of “constructing” coverage. Whether your insured uses large trucks, pickups or private passenger autos, a keen understanding of this coverage form begins with an understanding of coverage symbols.

Business Planning to Improve Your Agency Valuation

The first step in business planning is knowing where you are and identifying the risks in your business. During this session, agency owners will learn how to effectively business plan with the goal of improving their agency’s value. The session will identify the most important risk factors in an agency valuation and review the strategy to address each of these concerns to grow agency value. This will be a workshop style program where participants will leave with components of their business plan started, and practical tools to leverage in the journey to maximize the value of the agency.
